

# Quick Installation Guide

1. Open Google Chrome, Microsoft Edge, or any browser. Insert the link to the URL box <https://code.visualstudio.com/> and you will be directed to the website below.

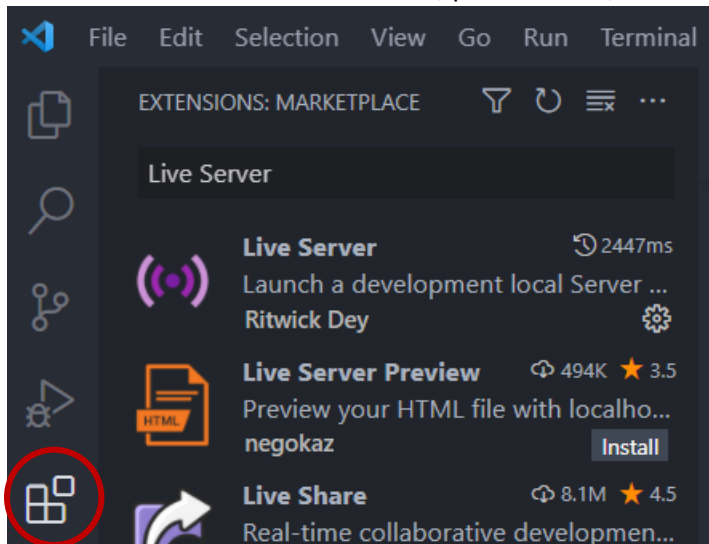

2. For macOS and Linux users, press the “Download for Windows button”. Choose which OS you use and download the stable one. After it has been downloaded, open the exe file, and follow the installation guide.

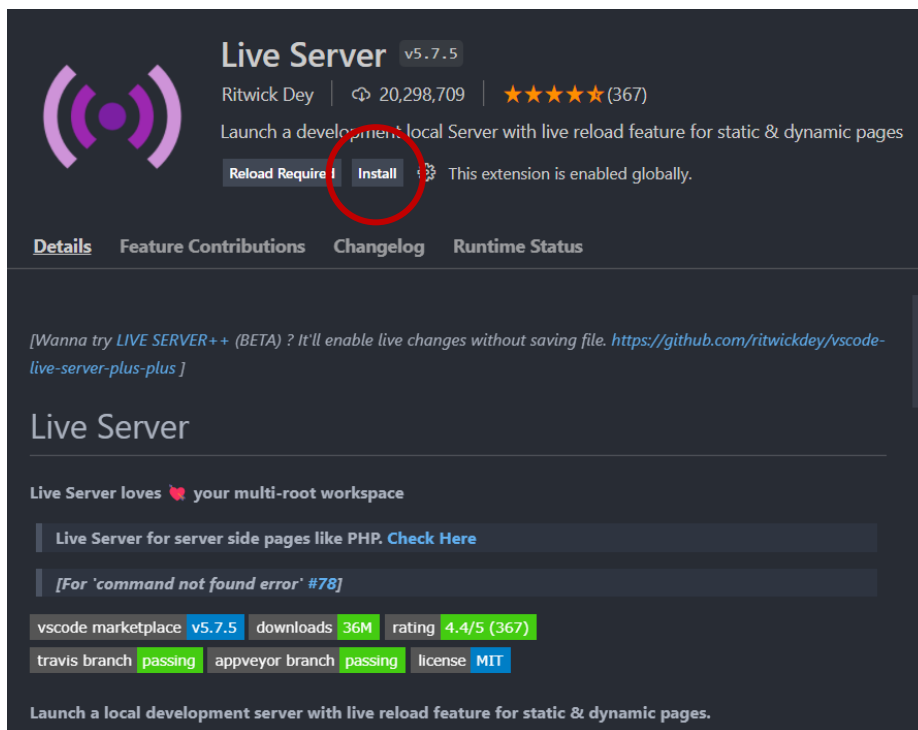

3. Above is the quick installation guide. If need more detail explanation, can watch the below directly:  
” [https://www.youtube.com/watch?v=JPZsB\\_6yHVo](https://www.youtube.com/watch?v=JPZsB_6yHVo)”.

- After that, open the Visual Studio Code application. From the left-hand side of your screen, there is an extension icon as shown below, press it. Next, find the live server extension.

- Finally, press install.

- Now all pre-event stuff has been done here, see you at the event on 9 April 2022, 2 PM to 4 PM. Any question can ask the committee. Thank you.
